

Nifty 100 Financial Intelligence Platform

Sprint 6 - Day 45 Final Acceptance Checklist

Acceptance Result: 17 PASS / 3 FAIL / 0 REVIEW out of 20 gates

Final disposition: CONDITIONAL ACCEPTANCE WITH DOCUMENTED SOURCE-DATA / ELIGIBILITY EXCEPTIONS. No source values, signals, financial calculations, or report eligibility rules were fabricated or weakened to force an acceptance gate to pass.

1. Acceptance Gate Summary

Gate	Status	Acceptance Requirement
AC01	PASS	Exactly 92 companies loaded
AC02	PASS	At least 90% have >=10 years P&L, BS and CF
AC03	PASS	Zero SQLite foreign-key violations
AC04	PASS	At least 1,100 financial-ratio rows
AC05	FAIL	Revenue CAGR cross-validation within 0.1%
AC06	PASS	ROE agrees with source within 5% for 5 companies
AC07	PASS	Quality screener returns 10-50 companies
AC08	PASS	Company profile response under 3 seconds
AC09	PASS	Screener CSV export is implemented
AC10	PASS	Five tearsheets have no visual overflow
AC11	PASS	API health endpoint returns 200
AC12	PASS	TCS has at least 10 years of ratio history
AC13	PASS	API screener output is consistent with screener engine/export
AC14	PASS	Peer-percentile outputs cover all 11 peer groups
AC15	PASS	All 92 companies have a cluster ID
AC16	FAIL	All 92 companies have >=1 PRO and >=1 CON
AC17	FAIL	All 92 tearsheets exist and are at least 30 KB
AC18	PASS	At least 60 tests with zero failures
AC19	PASS	validation_failures.csv has required columns
AC20	PASS	Analyst Guide is at least 10 pages

2. Detailed Acceptance Evidence

AC01 - PASS

Requirement: Exactly 92 companies loaded

Evidence: companies table rows = 92

AC02 - PASS

Requirement: At least 90% have >=10 years P&L, BS and CF

Evidence: 84/92 = 91.30%

AC03 - PASS

Requirement: Zero SQLite foreign-key violations

Evidence: foreign_key_check violations = 0

AC04 - PASS

Requirement: At least 1,100 financial-ratio rows

Evidence: financial_ratios rows = 1155

AC05 - FAIL

Requirement: Revenue CAGR cross-validation within 0.1%

Evidence: Maximum absolute divergence = 10.216500 percentage points; rows checked = 24

AC06 - PASS

Requirement: ROE agrees with source within 5% for 5 companies

Evidence: ICICIBANK: diff=0.81; BANKBARODA: diff=0.94; INDUSINDBK: diff=0.95; KOTAKBANK: diff=1.09; CANBK: diff=1.18

AC07 - PASS

Requirement: Quality screener returns 10-50 companies

Evidence: Sheet=Quality Compounder; rows=22

AC08 - PASS

Requirement: Company profile response under 3 seconds

Evidence: TCS status=200; elapsed=0.0173s

AC09 - PASS

Requirement: Screener CSV export is implemented

Evidence: download_button=True; CSV generation=True

AC10 - PASS

Requirement: Five tearsheets have no visual overflow

Evidence: Manual PDF visual QA completed previously; representative PDFs present=5/5.

AC11 - PASS

Requirement: API health endpoint returns 200

Evidence: HTTP status=200; body={'status': 'ok', 'version': '1.0.0', 'uptime_seconds': 0.42, 'db_row_counts': {'companies': 92, 'profitandloss': 1070, 'balancesheet': 1140, 'cashflow': 1056, 'analysis': 16, 'documents': 1457, 'prosandcons': 14, 'sectors': 92, 'stock_prices': 5520, 'market_cap': 552}}

AC12 - PASS

Requirement: TCS has at least 10 years of ratio history

Evidence: HTTP status=200; ratio rows=13

AC13 - PASS

Requirement: API screener output is consistent with screener engine/export

Evidence: API status=200; count=49; Day 42 integration test verifies API == run_screener.

AC14 - PASS

Requirement: Peer-percentile outputs cover all 11 peer groups

Evidence: peer_comparison.xlsx sheets=11; ['Automobiles', 'Consumer Finance', 'FMCG', 'IT Services', 'Life Insurance', 'Oil & Gas', 'Pharmaceuticals', 'Power & Utilities', 'Private Banks', 'Public Sector Banks', 'Steel']

AC15 - PASS

Requirement: All 92 companies have a cluster ID

Evidence: unique companies=92; non-null cluster IDs=92

AC16 - FAIL

Requirement: All 92 companies have >=1 PRO and >=1 CON

Evidence: PRO coverage=89/92; CON coverage=57/92. Source/rule limitations retained; no signals fabricated.

AC17 - FAIL

Requirement: All 92 tearsheets exist and are at least 30 KB

Evidence: PDFs=88/92; >=30KB=88/88. Companies with insufficient annual history were intentionally skipped.

AC18 - PASS

Requirement: At least 60 tests with zero failures

Evidence: pytest returncode=0; passed=168

AC19 - PASS

Requirement: validation_failures.csv has required columns

Evidence: columns=['rule_id', 'table', 'severity', 'status', 'message', 'action', 'row_index', 'company_id', 'year', 'field', 'issue']; missing=[]

AC20 - PASS

Requirement: Analyst Guide is at least 10 pages

Evidence: analyst_guide.pdf pages=18

3. Documented Exceptions

AC05 - Revenue CAGR cross-validation within 0.1%

Status: FAIL. The independent cross-validation identified a maximum absolute divergence of 10.2165 percentage points. The material outlier is INFY 3-year compounded sales growth: the source value is 5.0%, while the independently calculated value is 15.2165%. The discrepancy is retained as an auditable source/calculation exception rather than modifying the ratio engine or source value solely to satisfy the acceptance gate.

AC16 - All 92 companies must have at least one PRO and one CON

Status: FAIL. Deterministic signal generation produced PRO coverage for 89 of 92 companies and CON coverage for 57 of 92 companies. The defined signal rules and thresholds were preserved. Missing signals were not fabricated for companies that did not satisfy a qualifying condition.

AC17 - All 92 tearsheets must exist and be at least 30 KB

Status: FAIL. 88 of 92 companies satisfy the established financial-history eligibility requirement and have generated tearsheets. All 88 generated tearsheets are at least 30 KB. Four companies were intentionally skipped because they have insufficient annual financial history under the reporting eligibility rule. Empty or unsupported reports were not generated merely to reach a count of 92.

4. Quality and Release Evidence

Metric	Final Result
Companies loaded	92
Financial ratio rows	1,155
Long-history coverage	84/92 (91.30%)
Foreign-key violations	0
Automated tests	168 passed
API health	HTTP 200
TCS ratio history	13 rows
Quality screener	22 companies
Peer groups	11
Cluster assignments	92/92
Generated tearsheets	88/92 eligible
Valid tearsheets >=30 KB	88/88
Analyst Guide	18 pages
Acceptance gates	17 PASS / 3 FAIL / 0 REVIEW

5. Final Deliverable Archive

The final archive contains 23 top-level deliverables under output/final_deliverables/. This includes the API source, OpenAPI specification, Postman collection, clustering and statistical outputs, screener and valuation workbooks, financial intelligence outputs, 88 company tearsheets, 11 sector reports, portfolio summary, pytest report, performance notes, and Analyst Guide.

6. Team Lead Sign-off

I have reviewed the acceptance evidence and documented exceptions for the Nifty 100 Financial Intelligence Platform.

Team Lead Name	
Signature	
Date	
Decision	Accept / Accept with Exceptions / Reject

Checklist generated: 2026-09-10

The signature fields are intentionally blank and must be completed by the authorized team lead.
